

TESTIMONIAL

“I started work for Komplex in March and may I say am very impressed. I got phone call from a lady called Emma and she did my interview, she made me feel so relaxed. I then spoke to Rachel, the Operations Director who explained all about Komplex care, she was so enthusiastic about the work that was available in my region and that totally got my attention because we need a good quality care company in the North East.

Over the past five years, I have worked for numerous providers that all they seem interested in is making money and not about the clients well-being. Komplex Care is completely different. The way that Rachel explained how the company work and their shared values really excites me, because everybody deserves good care.

I went down to head office for my training with Molly and she made training fun and interesting. I can say I enjoyed my three days training I am so impressed with Komplex that I have even got my husband and friends to apply. I know this company will make a real difference in the North East and I am very proud to be working for them.”
